

Quick Start Guide

[REST API](#) | [Python](#) | [PHP](#) | [NodeJS](#) | [Ruby](#)

What is Api2Pdf.com?

Api2Pdf.com is a REST API for instantly generating PDF documents from HTML, URLs, Microsoft Office Documents (Word, Excel, Powerpoint), and images. The API also supports merge / concatenation of two or more PDFs. Api2Pdf is a wrapper for popular libraries such as **wkhtmltopdf**, **Headless Chrome**, and **LibreOffice**. You can also generate barcodes and QR codes with Zebra Crossing (ZXING).

Acquire API Key

Create an account at api2pdf.com to get your API key. It only takes a minute.

Test the API

From the URL below, replace {YourApiKey} with your API key you acquired and then copy and paste the URL below into a new browser window to test a simple GET request.

<https://v2.api2pdf.com/chrome/url?url=https://www.github.com&apikey={YourApiKey}>

Next Steps

Check out the [REST API doc](#) to see details on the other API calls available along with any advanced options and settings you can use. We also offer convenient packages in [Python](#), [PHP](#), [NodeJS](#), and [Ruby](#). If you have any questions or issues, please reach out to support@api2pdf.com
